Technical Data Sheet

Methyl Acetate

TYPICAL CERTIFICATE OF ANALYSIS			
Item	Unit	Index	Analysis results
Appearance	--	Transparent liquid	Passed
Purity (GB/T 3728-2007)	%	99.90min	99.96
Methanol (GB/T 3728-2007)	%	0.0060 max	0.0013
Water content (ASTM D1064-12)	%	0.050 max	0.0167
Acidity as acetic acid (ASTM D1613-06)	%	0.0010 max	0.0007
Color (ASTM D5386-10)	--	10 max	5
Density (20°C)	Kg/L	0.920-0.935	0.933

Application of Methyl Acetate

Methyl acetate, also known as methyl ethanoate, as an unrestricted natural contaminant emission, can meet environmental criteria as well as slowly replace acetone, butanone, ethyl acetate, cyclopentane as well as various other solvents. Furthermore, methyl acetate is also a vital fundamental organic chemical resources, which can be utilized as an intermediate in the manufacturing of drugs as well as pesticides, along with in the manufacturing of preservative, layers, inks, materials, adhesives as well as paints.
